Manufactured for:
Atticus, LLC
5000 CentreGreen Way, Suite 100
Cary, NC 27513

This information is for promotional purposes only. Space considerations may require information to be omitted. Always refer to the actual package for complete label verbiage. This product may not yet be available or approved for sale or use in your area.

It is not manufactured or distributed by BASF Corporation, seller of Pylon®.

Contains chlorfenapyr, the active ingredient used in Pylon®.

For Use Only On Fruiting Vegetables and Ornamental Crops Grown in Commercial Greenhouses

Active Ingredient: .................................................... (% by weight)
Chlorfenapyr*: .......................................................... 21.4%
Other Ingredients .......................................................... 78.6%
Total ........................................................................ 100.0%

* 4-bromo-2-(4-chlorophenyl)-1-(ethoxymethyl)-5-(trifluoromethyl)-1'H-pyrrole-3-carbonitrile
Contains 2.0 pounds of chlorfenapyr per gallon.
EPA Reg. No.: 91234-19

KEEP OUT OF REACH OF CHILDREN

CAUTION

If you do not understand the label, find someone to explain it to you in detail.

See Inside Booklet For First Aid, Precautionary Statements, and Directions For Use.

FIRST AID

IF SWALLOWED
• Call a poison control center or doctor immediately for treatment advice.
• Have person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by the poison control center or doctor.
• Do not give anything by mouth to an unconscious person.

IF ON SKIN
• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

IF INHALED
• Move person to fresh air.
• If person is not breathing, call 911 or an ambulance; then give artificial respiration, preferably by mouth to mouth, if possible.
• Call a poison control center or doctor for further treatment advice.

IF IN EYES
• Hold eye open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eyes.
• Call a poison control center or doctor for treatment advice.

HOT LINE NUMBERS

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For additional information on this pesticide product (including health concerns, medical emergencies, or pesticide incidents), you may call SafetyCall® at 1-844-685-9173, 24 hours per day, 7 days per week. For chemical emergency: spill, leak, fire, exposure or accident, you may call CHEMTREC: 1-800-424-9300.

For Chemical Emergency Spill, Leak, Fire, Exposure, or Accident Call CHEMTREC Day or Night
Within USA and Canada: 1-800-424-9300 or +1 703-527-3887 (collect calls accepted)

Piston is not manufactured or distributed by BASF Corporation, seller of Pylon®.
PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed, inhaled or absorbed through the skin. Causes moderate eye irritation. Avoid breathing vapors or spray mist. Avoid contact with skin, eyes or clothing. Wash hands thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing before reuse.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Some materials that are chemical-resistant to this product are listed below.

Applicators and Other Handlers Must Wear: (1) long-sleeved shirt and long pants; (2) chemical-resistant gloves, such as Barrier Laminate (≥ 14 mils), Butyl Rubber (≥ 14 mils), Nitrile Rubber (≥ 14 mils), Neoprene Rubber (≥ 14 mils), Polyvinyl Chloride (PVC) (≥ 14 mils), or Viton (≥ 14 mils); (3) shoes plus socks.

In Addition, All Mixers/Loaders/Applicators of Liquids Using a Mechanically-Pressurized Handgun for Application to Fruiting Vegetables Grown in Commercial Greenhouses Must Wear: (1) long-sleeved shirt and long pants; (2) chemical-resistant gloves, such as Barrier Laminate (≥ 14 mils), Butyl Rubber (≥ 14 mils), Nitrile Rubber (≥ 14 mils), Neoprene Rubber (≥ 14 mils), Polyvinyl Chloride (PVC) (≥ 14 mils), or Viton (≥ 14 mils); (3) Pf 5 respirator; and (4) shoes plus socks.

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry. Discard clothing and other absorbent materials that have been drenched or heavily contaminated with the product's concentrate. Do not reuse them.

ENGINEERING CONTROLS STATEMENT

When handlers use closed systems or enclosed cabs in a manner that meets the requirements of the Worker Protection Standard (WPS) for agricultural pesticides (40 CFR 170.240 (d) (4-6)), the handler PPE requirements may be reduced or modified as specified in the WPS.

IMPORTANT: When reduced PPE is worn because a closed system is being used, handlers must be provided all PPE specified above for applicators and other handlers, and have such PPE immediately available for use in an emergency, such as a spill or equipment breakdown.

USER SAFETY RECOMMENDATIONS

This pesticide is toxic to aquatic organisms, birds, and wildlife. This product is toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds if bees are actively foraging in the treatment area.

Do not contaminate water by cleaning of equipment or when disposing of equipment washwaters or rinsate. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or regional office of the EPA. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge.

Do not apply this product around electrical equipment due to the possibility of shock hazard. Do not mix or allow this product to come into contact with an oxidizing agent. Hazardous chemical reaction may occur.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the treated area during application. For any requirements specific to your state or tribe, consult the agency responsible for pesticide regulation.

USE RESTRICTIONS
• Do not apply Piston except as specified on this label.
• Do not apply Piston in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the treated area during application.
• Do not use Piston on any other crops except fruiting vegetable crops and ornamental crops grown in commercial greenhouses.
• Do not contaminate food or feedstuffs.
• Do not apply Piston through any type of irrigation system.
• Do not tank mix with products that contain a label prohibition against tank mixing.
• Do not apply more than three (3) applications of Piston during a crop growing cycle.
• Do not use Piston to formulate, reformulate or repurpose into any other pesticide product without the written permission of Atticus, LLC.
• Do not apply more than 39 fl ozs of Piston (0.6 lb ai) per acre, per crop growing cycle in fruiting vegetables.
• Do not apply more than three (3) applications of Piston during a crop growing cycle.
• Do not apply Piston in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the treated area during application.
• Do not apply Piston through any type of irrigation system.
• Do not tank mix with products that contain a label prohibition against tank mixing.
• Do not use Piston to formulate, reformulate or repurpose into any other pesticide product without the written permission of Atticus, LLC.
• Do not apply more than 39 fl ozs of Piston (0.6 lb ai) per acre, per crop growing cycle in fruiting vegetables.
• Do not apply more than three (3) applications of Piston during a crop growing cycle.
• Do not apply this product around electrical equipment due to the possibility of shock hazard. Do not mix or allow this product to come into contact with an oxidizing agent. Hazardous chemical reaction may occur.

ENVIRONMENTAL HAZARDS

PRODUCT INFORMATION

Piston is a broad-spectrum insecticide-miticide for use on greenhouse grown fruiting vegetables and greenhouse grown ornamentals. It has excellent stomach activity when ingested and good contact activity when pests come in contact with it. Piston is classified in a class of insecticides-miticides called Pyrroles. Members of this class of products have a similar mode of action that involves uncoupling oxidative phosphorylation and preventing conversion of ADP to ATP which affects energy metabolism so that mites and insects cannot generate enough energy to survive.

Do not use Piston on any other crops except fruiting vegetable crops and ornamental crops grown in commercial greenhouses.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard (WPS), 40 CFR Part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), notification to workers, and restricted-entry interval.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 12 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is: (1) Coveralls; (2) Chemical-resistant gloves, such as Barrier Laminate (≥ 14 mils), Butyl Rubber (≥ 14 mils), Nitrile Rubber (≥ 14 mils), Neoprene Rubber (≥ 14 mils), Polyvinyl Chloride (PVC) or Viton (≥ 14 mils); (3) Shoes plus socks.

Users should: (1) Wash hands thoroughly before eating, drinking, chewing gum, using tobacco, or using the toilet. (2) Remove contaminated clothing/PPE immediately and then wash thoroughly and change into clean clothing. (3) Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

Do not use in an emergency, such as a spill or equipment breakdown.

PRODUCT INFORMATION

Piston is a broad-spectrum insecticide-miticide for use on greenhouse grown fruiting vegetables and greenhouse grown ornamentals. It has excellent stomach activity when ingested and good contact activity when pests come in contact with it. Piston is classified in a class of insecticides-miticides called Pyrroles. Members of this class of products have a similar mode of action that involves uncoupling oxidative phosphorylation and preventing conversion of ADP to ATP which affects energy metabolism so that mites and insects cannot generate enough energy to survive.

Piston does not have ovicidal activity. Therefore, it should be used in combination with a registered miticide or insecticide with ovicidal activity if moderate to heavy numbers of mite or insect eggs are present at application time.

Resistance Management: All crop protection chemicals should be used in resistance pest management programs suitable for the crop-pest complex involved. The program should involve different classes of chemistry in the control of the pests. For more information on insect resistance, contact the local Cooperative Extension Service for suggestions on minimizing insect resistance.

When using Piston in greenhouses, do not apply more than two (2) consecutive applications before rotating to an insecticide-miticide with a different mode of action. In addition, do not apply Piston to consecutive crops in the commercial greenhouse unless applied in combination with another insecticide-miticide with a different mode of action.

Mixing Instructions: Agitate or shake Piston containers prior to use in order to prepare a uniform spray solution. Add ½ to ¾ of the required amount of clean water to the spray tank and start agitation. Measure the required amount of Piston with a calibrated measuring device and add to the spray tank while agitating. Add the rest of the water and continue with agitation. If preparing a tank-mixture, add Piston to the tank first and mix with products that contain a label prohibition against tank mixing. Do not mix or allow this product to come into contact with an oxidizing agent. Hazardous chemical reaction may occur.

Tank Mixing: As stated above, if using Piston in a tank-mixture, always add Piston to the spray tank first and make sure it is fully dispersed in water before adding any other tank-mix product. Follow all applicable directions, restrictions and precautions on the label for the tank mix partners. The most restrictive labeling applies when using a tank mix. Do not tank mix with products that contain a label prohibition against tank mixing. It is unlawful to tank mix Piston if the tank mix will be used outdoors.
FRUITING VEGETABLE CROPS GROWN IN COMMERCIAL GREENHOUSES

Piston is broad-spectrum and can be used to control insect and mite pests on greenhouse grown fruiting vegetables such as eggplant, ground cherry, pepino, pepper, tomatillo, and tomato. If multiple pests are present, always use the rates required to control the most difficult pest. Use lower rates when populations are at action thresholds and higher rates when populations have reached economic injury levels for yield or quality.

**Application Instructions:** Always maintain agitation during application. Use the suggested dosage in sufficient water for thorough coverage of foliage. Piston can be applied up to and including the day of harvest.

**Use Restrictions for Fruiting Vegetables Grown in Commercial Greenhouses**
- Apply Piston according to the product guidelines and restrictions stated in the “USE RESTRICTIONS” and “Resistance Management” sections of this label.
- Do not apply Piston as an ultra-low volume (ULV) spray.
- Do not use on tomato varieties with a mature fruit diameter of less than one (1) inch.
- Allow at least 5 to 7 days between applications.
- Do not apply more than 39 fl ozs of Piston (0.6 lb ai) per acre, per crop growing cycle in fruiting vegetables grown in commercial greenhouses.
- It is unlawful to use a tank-mixture with Piston outdoors.

**ORNAMENTAL CROPS GROWN IN COMMERCIAL GREENHOUSES**

On greenhouse ornamentals, Piston is broad-spectrum and controls mites, insects and foliar nematodes. If multiple pests are present, always use the rates required to control the most difficult pest. Use lower rates when populations are at action thresholds and higher rates when populations have reached economic injury levels for yield or quality.

**Application Instructions:** Always maintain agitation during application. Use the suggested dosage in sufficient water for thorough coverage of foliage.

**Use Restrictions for Ornamental Crops Grown in Commercial Greenhouses**
- Apply Piston according to the product guidelines and restrictions stated in the “USE RESTRICTIONS” and “Resistance Management” sections of this label.
- Do not apply more than 41 fl ozs of Piston per 100 gallons per crop per season or 0.64 lb of active ingredient per 100 gallons per crop per season in ornamentals grown in commercial greenhouses (start to finish for one ornamental crop).
- It is unlawful to use a tank-mixture with Piston outdoors.

**Crop Tolerance:** Although Piston has been shown to be safe to many ornamental species when used according to label use directions, not all ornamental plant species and cultivars have been tested for tolerance to Piston, tank-mix combinations of Piston, or pesticide treatments before or after those of Piston. Also, since local conditions can influence plant tolerance, they may not match the conditions under which testing of Piston was conducted.

**Sensitive Ornamental Plant Species:** Some ornamental plant species have been found, under certain conditions, to be less tolerant to Piston when used according to label directions. Phytotoxicity is likely to occur if Piston is applied to the following ornamental plant species: Dianthus (Dianthus spp.) including carnations, pinks and Sweet William varieties, Kalanchoe (Kalanchoe blossfeldiana), Poinsettia (Euphorbia pulcherrima), Roses (Rosa spp.), Salvia (Salvia spp.) and Zinnia (Zinnia spp.).

If application is made to these sensitive ornamental plant species it is made at grower risk.

**Follow these suggestions to reduce potential injury to ornamentals:**
1. Do not apply to plugs in their early stages of development (1 to 2 leaf) as injury to some tender crops could occur. If application to plugs is necessary, test Piston on a small number of plants before doing large scale treatments.
2. Apply Piston during the coolest parts of the day and always apply prior to blooming or avoid applications to bloom where possible.
3. Prior to application, evaluate for potential phytotoxicity of all tank mixes with additives or other pesticide products. Additives, including spray adjuvants, are not necessary for use with Piston. Crop oils, surfactants and fertilizer adjuvants have been shown to increase the likelihood of phytotoxicity and are not recommended with Piston. If greenhouse crops are under high temperature conditions, use caution whenever including an additive with Piston because the injury potential is higher. Do not tank mix with products that contain a label prohibition against tank mixing. Apply the tank mix to a small area (8 to 12 plants) and evaluate for 3 to 5 days before attempting a large-scale spray to make certain that no phytotoxicity occurs.

Storage and Disposal
Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage
Keep Piston in its tightly closed original container, when not in use. Do not store below 32°F. Do not store in direct sunlight. Store in a cool, dry (preferably locked) area that is inaccessible to children and animals.

Pesticide Disposal
Wastes resulting from the use of Piston may be disposed of on-site or at an approved waste disposal facility.

Container Disposal
Nonrefillable Container: Do not use or refill this container. Triple rinse or pressure rinse container (or equivalent) promptly after emptying (see rinsing instructions below).

Triple rinse container small enough to shake (capacity ≤ 5 gallons) as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container ¼ full with water and recap. Shake for 10 seconds. Pour rinse into application equipment or a mix tank, or store rinseate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Offer for recycling if available for reconditioning if appropriate, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

Pressure rinse as follows: Empty the remaining contents into application equipment or mix tank and continue to drain for 10 seconds after the flow beings to drip. Hold container upside down over application equipment or mix tank, or collect rinseate for later use or disposal. Insert pressure rinsing nozzle in the side of the container or rinseate at about 40 PSi for at least 30 seconds. Drain for 10 seconds after the flow begins to drip. Offer for recycling if available for reconditioning if appropriate, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

Steps to be taken in case material is released or spilled:
Dike and contain the spill in inert material (sand, earth, etc.) and transfer liquid and solid diking material to separate containers for disposal. Keep the spill out of all sewers and open bodies of water.

LIMITATION OF WARRANTY AND LIABILITY
IMPORTANT: READ BEFORE USE. Read the entire Directions for Use, Conditions of Warranties and Limitations of Liability before using this product. If these terms and conditions are not acceptable, return the unopened product container at once. By using this product, user or buyer accepts the following Disclaimer of Warranties and Limitations of Liability.

CONDITIONS: The directions for use of this product are believed to be adequate and must be followed carefully. However, it is impossible to eliminate all risks associated with the use of this product. Ineffectiveness, injury, and other unintended consequences may result because of such factors as manner of use or application (including misuse), the presence of other materials, weather conditions, and other unknown factors, all of which are beyond the control of ATTICUS, LLC. All such risks shall be assumed by the user or buyer.

DISCLAIMER OF WARRANTIES: To the extent consistent with applicable law, ATTICUS, LLC makes no other warranties, express or implied, of merchantability or of fitness for a particular purpose or otherwise, that extend beyond statements on this label.

LIMITATIONS OF LIABILITY: To the extent consistent with applicable law, neither ATTICUS, LLC the manufacturer, nor the Seller shall be liable for any indirect, special, incidental or consequential damages resulting from the use, handling, application, storage, or disposal of this product. To the extent consistent with applicable law, the exclusive remedy of the user or buyer for any and all losses, injuries or damages resulting from the use, handling, application, or storage of this product, whether in contract, warranty, tort, negligence, strict liability or otherwise, shall not exceed the purchase price paid.
