

Contains etoxazole, the active ingredient used in Zeal® Miticide.

INSECTICIDE

END MITE PROBLEMS WITH THE LONG-LASTING CONTROL OF ZARA™ WSB.

Mites may be tiny but they can cause big problems for almond growers. Zara™ WSB is a fast-acting, broad spectrum insecticide-miticide that eliminates two spotted spider mites, European red mites, Pacific spider mites and more. Zara WSB contains etoxazole, the active ingredient used in Zeal® Miticide, which targets mites at all life stages; egg, larva, nymph and adult. The mite growth regulator is readily absorbed and moves translaminar through the plant to reach mites across the entire plant surface, including both sides of the leaves.

Zara WSB is most effective when mite populations are low and delivers on-contact control as well as long-lasting residual protection. Uniform, full coverage is important and the convenient three ounce water soluble bag offers easy, accurate mixing to deliver the best results. And, straightforward pricing from Atticus makes it simple to put Zara WSB to work and put mite problems behind you.

KEY BENEFITS

- Fast-Acting Broad-Spectrum Miticide
- Long-Lasting Residual
- Full Life Cycle Control
- Reliable Translaminar Activity

KEY USES

- Almonds
- Apples
- Corn
- Cotton
- Grapes
- Pears
- Strawberries
- Walnuts
- Hops

Refer to label for specific use restrictions.

PRODUCT NOTES

EPA REGISTRATION NUMBER

91234-43

ACTIVE INGREDIENT

Etoxazole 72%

FORMULATION

Wettable Powder

IRAC NUMBER

10B

SIGNAL WORD

Caution

PACKAGE SIZE

4 x 4 x 3 wt oz

RESTRICTED USE

No

Relevant. Simple. Reliable.

APPLICATION INFORMATION

For best results apply early when mite pressure is low. Use enough spray volume to ensure thorough coverage.

Refer to product label for step-by-step instructions for mixing.

Number of Water Soluble Packets Required to Treat Specified Number of Acres		
Rate (oz/A)	Number of Acres to be Treated	Number of 3 oz. Packets Required
0.66	45	10
1.0	30	10
2.0	15	10
3.0	10	10
4.0	7.5	10

TREE NUTS

PRODUCT RATE OZ/ACRE: 2.0 to 3.0 (0.09 to 0.135 lb ai/A)

Apply by ground with airblast equipment as a full coverage spray. Best results are achieved when mite populations are low. Zara WSB is predominately an ovicide/larvicide. For best results, apply Zara WSB at or prior to threshold for your area but not greater than the maximum rate listed. Choose lower rate for light infestations and higher rate for heavy infestation. Do not use below use rate of 2.0 oz/A (0.09 lb ai/A) as this may result in poor control and contribute to the development of resistance to etoxazole among mite populations.

RESTRICTIONS

- Preharvest interval (PHI) is 28 days.
- Do not make more than one (1) Zara WSB application per season.
- Do not apply more than 3.0 oz (0.135 lb ai) Zara WSB per acre per season.

MANAGING RESISTANCE:

Repeated use of the same class of miticides or miticides with similar modes of action can lead to the buildup of resistant mite strains. Use Zara WSB in alternation with miticides having different modes of action and/or that belong to different chemical classes. Follow local, state, and federal Integrated Pest Management (IPM) and Resistance Management (RM) recommendations. Read and follow all product labels before applying any miticide.

Refer to product label for complete application and mixing instructions.
